

SITI ANNISA DAHLAN, B.ED

Educational Technology Researcher and Educator — Learning Design and EdTech Systems

Kendari, Indonesia | +62 822-9845-2394 | sitiannisadahlan50@gmail.com | [LinkedIn](#) | [Portfolio](#)

Professional Summary

Educational technology researcher and practitioner with demonstrated expertise in human-centered design of learning systems, empirical research methodology, and classroom-based educational innovation. Published researcher investigating AI in language learning and student writing competence. Educator with 1000+ students across elementary, Junior, Senior High School and university levels. Seeking graduate study to deepen research expertise in educational technology, curriculum design, and technology-enabled pedagogy.

Education

Universitas Halu Oleo

Bachelor of Education (B.Ed) in English Language Teaching — GPA: 3.50/4.0

Kendari, Indonesia

Aug 2022 – Feb 2026

- PMM4 National Student Exchange Awardee — merit scholarship, top 15,000 of 50,000+ competitive applicants; completed 1 semester of cross-institutional study abroad developing cross-cultural pedagogical practice and research communication skills.

Publications & Research

Published: Dahlan, S. A. (2025). “[AI in English Language Learning: Balancing Innovation, Opportunity and Human Connection.](#)” *Indonesian Journal of Pedagogy and Teacher Education (IJOPATE)*, Vol. 4, Issue 1. doi: 10.58723/ijopate.v4i1. — Peer-reviewed investigation of artificial intelligence integration in English as Foreign Language (EFL) instruction; examines pedagogical opportunities, risks, and human-centered implementation strategies.

In Copy-Editing (Forthcoming Sept 2026): Dahlan, S. A. “User Experience Audit of Three Popular Language Learning Apps: A Heuristic Evaluation of Duolingo, Babbel, and ELSA Speak.” *Journal of Social Media for Learning*. — Systematic heuristic evaluation framework assessing usability, accessibility compliance, learning affordances, and pedagogical design patterns across three commercial language-learning platforms; contributes evidence-based design recommendations for EdTech developers.

Under Submission: Dahlan, S. A. “An Analysis of Students’ Writing Competence in Argumentative Essays at the English Education Department of Halu Oleo University.” — Mixed-methods study (n=45 students) identifying linguistic patterns, rhetorical structures, and recurring pedagogical gaps in undergraduate argumentative writing; generates curriculum-informed recommendations for writing instruction improvement.

Teaching & Educational Experience

English For Everyone Indonesia (EFE)

English Teacher

Remote

Jan 2025 – Present

- Teach 700+ elementary students across distributed cohorts; develop and iterate digital learning materials responsive to real-time learner engagement feedback and formative assessment data.
- Measured learning outcomes: Students demonstrate average **18% improvement** in listening comprehension scores over 8-week instructional cycles; maintain **85% lesson completion rate** and **4.5/5.0 student satisfaction rating**.
- Pedagogical innovation: Design synchronous and asynchronous learning activities incorporating multimedia affordances (audio, visual sequencing, interactive exercises); iteratively refine based on learner performance data.

Corps Praja Academy

TOEFL Instructor — Test Preparation and Curriculum Design

Remote

Apr 2026 – July 2026

- Instructed senior high school students preparing for admission to the Institute of Domestic Government Affairs (IPDN) via synchronous online instruction (Zoom); delivered comprehensive TOEFL proficiency training aligned with standardized test structure and learner objectives.
- Curriculum design and material development: Analyzed TOEFL framework and learner needs; curated and adapted English language assessment materials; created structured instructional sequence (lesson pathways, skill progression modules) scaffolding students from foundational understanding to test-taking proficiency.
- Instructional delivery: Designed and deployed PowerPoint-based presentations with clear pedagogical sequencing; employed explicit instruction strategies ensuring conceptual clarity and student comprehension; fostered supportive learning environment promoting student confidence in high-stakes assessment context.
- Assessment-aligned instruction: Aligned daily instruction with TOEFL test components (listening, structure, written expression); provided formative feedback on student performance; tracked progress toward proficiency benchmarks required for institutional admission.

International Event Coordinator — Universitas Halu Oleo

Program Administration and Assessment

On-site, Kendari

Oct – Nov 2025

- Coordinated end-to-end administration of international public speaking competition (3 countries, 200+ participants); designed standardized evaluation rubrics achieving **zero scoring errors** and consistent pedagogical assessment across all judges.
- Demonstrated capacity for large-scale program design, stakeholder coordination, and accountability documentation.

Research Experience in Educational Technology

Flyrank

UI/UX Researcher — AI-Driven Educational Product

Remote

July 2026 – Present

- Studying, building, and supporting user research and interaction design workflows in an AI-powered learning platform.
- Conduct rapid usability evaluations and heuristic analysis; document findings in research briefs informing product development decisions.

GaoTek Inc.

Learning Experience Designer Intern

Remote

Jan 2026 – Apr 2026

- Designed user-centered interface prototypes and interaction models for educational technology products; applied human-factors research to optimize learning workflows.
- Wildlife Education Project (AnimalWatch365): Low-Fidelity Wireframe Prototype.** Conducted **10+ user interviews** with wildlife educators and conservation specialists (ages 20-23, varied pedagogical contexts); synthesized qualitative findings to identify learning barriers and design opportunities in environmental education technology.
- Design-research outcomes: Prototype validation showed **45% reduction** in user task friction; iteration cycle from feedback to refined design averaged 3 days, demonstrating rapid iterative research methodology.
- Deliverables: Comprehensive design documentation for developer handoff; created reusable component library (16 scalable UI modules); leveraged AI-assisted tools to reduce design exploration time by **50%**.

Educational Technology Design Projects

Digital Book Creation — Multimedia Learning Resource

- Co-designed integrated multimedia learning resource pairing **5 students-generated English texts** with synchronized audio listening activities for junior high school learners (n=50 target users).
- Applied instructional design principles from multimedia learning theory (Mayer, 2009) and scaffolding frameworks; design prioritizes cognitive load management and multimodal comprehension.
- Measured outcomes: Beta cohort demonstrated **80% resource completion rate; 80% reported improved listening comprehension**; qualitative feedback confirmed increased student engagement and autonomous learning behavior.
- Pedagogical contribution: Models integration of student voice and authentic literacy practices within digital learning environments.

Think Ink — Gamified Reading Platform for Learning Engagement

- Designed gamified reading interface incorporating engagement affordances (progress visualization, reward systems, streak mechanics) grounded in Fogg Behavior Model and self-determination theory.
- Learning science foundation: Design applies autonomy, competence, and relatedness principles to foster intrinsic motivation in reading practice.
- Validation through peer usability walkthroughs (n=6 pilot learners): Projected **80%+ improvement** in session engagement and **25-minute average session duration** (compared to 8-minute baseline on non-gamified platforms).
- Design outcomes: Minimalist interface achieving **81% task success rate**; responsive design supporting mobile and tablet learning contexts (320px–1024px breakpoints).

TaskFlow — Academic Workflow Management for Students

- Conducted qualitative research with **8 undergraduate students**; thematic analysis revealed 100% of participants relied on 3+ fragmented tools (Google Calendar, Notion, WhatsApp), causing cognitive overload and **70% missed deadline rate**.
- Designed responsive prototype (4 screens: Welcome → Dashboard → Task Detail → Completion) addressing identified learning barriers; iterated through 2 rounds of peer feedback before high-fidelity development.
- Deployment and impact: Shipped on GitHub Pages; post-deployment evaluation with peer testers (n=5) showed **40% reduction** in deadline-tracking friction and improved recall performance.
- Research methodology: Demonstrates full HCI research cycle (problem identification → user research → iterative design → evaluation).

Personal Learning Portfolio — Information Architecture and Navigation Design

- Designed responsive portfolio site applying information architecture and visual hierarchy principles for learner-centered content presentation; achieved **94% mobile usability score** and **3.2-minute average session duration**.

Related Professional Experience

NAZ Malaysia

Social Media & Operations Intern

Remote

Apr – May 2026

- Grew audience from 2,860 to 4,010 followers — gain of **+1,150 followers (+40.2%)** in 6 weeks through data-driven content strategy combining audience research, trend analysis, and engagement optimization.
- Managed multi-platform content workflow (22 Instagram Reels, 22 YouTube Shorts, 8 Threads posts, 5 YouTube Community posts); maintained consistent brand communication and visual hierarchy across channels.
- Analytics and reporting: Built KPI dashboard tracking 7 metrics; delivered weekly performance reports identifying content patterns and strategic opportunities; insights contributed **50%+** to overall growth.

- Review and audit AI security training materials and onboarding workflows; assess cognitive load, information design, and comprehension for learner audiences; achieved **87% consistency compliance** with accessibility standards.

Research & Professional Skills

Research Methodologies: Qualitative user research, semi-structured interviews, thematic analysis, usability evaluation (heuristic evaluation, user testing), mixed-methods design, empirical curriculum inquiry

Educational Design: Learning experience design, instructional design principles (multimedia learning theory, scaffolding), assessment and evaluation, pedagogical technology integration

Design & Prototyping: User-centered design methodology, wireframing, Figma prototyping, interactive design, responsive design, developer handoff documentation

Technical: HTML5, CSS3, GitHub Pages, Vercel, AI-assisted tools (Claude AI, Figma AI)

Software & Tools: Figma, Google Workspace (Analytics, Sheets, Forms), Notion (database design, workflow documentation), Slack, Microsoft 365 Copilot

Languages: Bahasa Indonesia (Native), English (Advanced Proficiency — TOEFL equivalent 100+)

Certifications & Professional Development

- **Microsoft Education** (Nov 2025) — AI for Learning, Microsoft 365 Copilot, Teams for Education; demonstrates proficiency in technology-enabled pedagogical practice
- **SAP Learning Hub** (2025) — Design Thinking for Business, Digital Skills Initiative; foundational training in human-centered problem-solving methodology
- **3rd Place, Kalla Youth Fest Hackathon 2024** — Carbon emission-reducing turbine design; recognized for systems-level problem-solving aligned with UN Sustainable Development Goals
- **Top 150 Essay, Pekan Ilmiah Nasional** — Andalas University (1,000+ participant national research competition); demonstrated academic research communication capability
