

SITI ANNISA DAHLAN, B.ED

Junior UI/UX Designer and UX Researcher — Human-Centered Systems Design

Kendari, Indonesia | +62 822-9845-2394 | sitiannisadahlan50@gmail.com | LinkedIn | Portfolio

Professional Summary

Junior UI/UX Designer with 1+ year of combined experience bridging design practice with HCI research methodologies. Demonstrated expertise in user research (10+ interviews per project), iterative prototyping, usability evaluation, and translating qualitative insights into quantified design improvements. Published researcher in education technology. Seeking graduate study to formalize research expertise in human-computer interaction and educational systems design.

Education

Universitas Halu Oleo

Bachelor of Education (B.Ed) in English Language Teaching — GPA: 3.49/4.0

Kendari, Indonesia

Aug 2022 – Feb 2026

- PMM4 National Student Exchange Awardee — merit scholarship, top 15,000 of 50,000+ competitive applicants; completed 1 semester of cross-institutional study abroad developing cross-cultural communication and research skills.

Publications

Dahlan, S. A. “*User Experience Audit of Three Popular Language Learning Apps: A Heuristic Evaluation of Duolingo, Babbel, and ELSA Speak.*” *Journal of Social Media for Learning.* — Systematic heuristic evaluation framework assessing usability, accessibility compliance, learning affordances, and pedagogical design patterns across three commercial language-learning platforms; contributes evidence-based design recommendations for EdTech developers.

“*AI in English Language Learning: Balancing Innovation, Opportunity and Human Connection.*” *Indonesian Journal of Pedagogy and Teacher Education (IJOPATE)*, Vol. 4, Issue 1 (2025).

“*An Analysis of Students’ Writing Competence in Argumentative Essays at the English Education Department of Halu Oleo University.*” Under submission. Mixed-methods study (n=45) identifying linguistic patterns and pedagogical gaps in undergraduate argumentative writing; contributes data-driven recommendations for curriculum design.

Research & Design Experience

Flyrank

UI/UX AI Intern

Remote

July 2026 – Present

- Support UI/UX design research and interaction design workflows in AI-driven SaaS environment; apply Nielsen’s usability heuristics and iterative prototyping methodology to live product features reaching 5,000+ active users.
- Conduct rapid usability walkthroughs and heuristic evaluations; document findings in structured design briefs for engineering handoff.

Filesig Pte Ltd (Singapore)

Freelance QA Designer — AI Security Materials

Remote

June 2026 – Present

- Review and audit AI security training materials, brand carousels, and onboarding flows; assess cognitive load, visual hierarchy, and information architecture for comprehension across diverse user populations.
- Provide design feedback on 15+ learning modules; achieve 100% consistency compliance with brand guidelines and accessibility standards.

GaoTek Inc.

UI/UX Designer Intern

Remote

Jan 2026 – Apr 2026

- Designed wireframes, user flows, and high-fidelity Figma prototypes across complete design-development cycle within Agile framework (daily standups, bi-weekly sprints, design reviews).
- AnimalWatch365 Project** (Primary Ownership): [Low-Fidelity Wireframe Prototype](#). Conducted **10+ user interviews** with wildlife researchers and conservationists (ages 22–58, varied technical backgrounds); synthesized qualitative findings into prioritized design improvements addressing species discovery, real-time tracking, and conservation alert workflows.
- Design impact: Core task completion friction reduced by estimated **55%** post-prototype validation through peer usability walkthroughs; iteration cycle from feedback to implementation averaged 3 days.
- Deliverables: Pixel-accurate developer handoff documentation with component specifications, interaction states, and responsive breakpoints; built reusable UI component library (16 scalable modules); leveraged Claude AI and Figma AI to reduce concept exploration time by **65%**.
- Cross-functional collaboration: Coordinated daily design reviews with product managers and engineering leads; incorporated feedback across 4 iteration cycles before launch.

Independent HCI Projects

[Personal Website — Portfolio & Research Showcase](#)

- Built personal website from scratch, presenting UI/UX case studies, publications, and projects; developed and iterated in Visual Studio Code with OpenRouter-assisted workflow, then pushed to GitHub and deployed live.

[TaskFlow — Academic Deadline Management App](#)

- Full HCI research-to-deployment cycle: Conducted **8 participant user interviews** with undergraduate students; qualitative analysis revealed 100% of participants relied on 3+ fragmented tools (Google Calendar, Notion, WhatsApp), causing cognitive overload and missed deadlines in 70% of cases.
- Designed 4-screen responsive prototype (Welcome → Dashboard → Task Detail → Completion) addressing core pain points; iterated wireframes through 2 rounds of peer feedback before Figma high-fidelity build.
- Development and deployment: Built with HTML5/CSS3, deployed to GitHub Pages; post-deployment feedback showed estimated **40% reduction** in task-tracking friction and improved deadline recall among peer testers (n=5).

Think Ink — Gamified Student Reading Platform

- Designed gamified reading interface incorporating engagement patterns (progress tracking, visual reward badges, streak mechanics); applied principles from Fogg Behavior Model and self-determination theory.
- Validated through **peer usability walkthroughs** (n=6 pilot users); qualitative feedback projected **80%+ improvement** in session retention and 25-minute average session duration (baseline comparison: non-gamified platforms averaged 8 minutes).
- UI/UX outcomes: Minimalist design achieving 92% task success rate in core reading pathway; responsive across mobile and tablet (320px–1024px breakpoints).

Digital Book Creation — Collaborative Learning Resource

- Co-designed integrated multimedia learning resource pairing **100+ student-generated English texts** with synchronized audio listening activities for junior high school learners (n=120 target users).
- Applied instructional design principles (multimedia learning theory, scaffolding); achieved 88% completion rate among beta test cohort, with 91% reporting improved listening comprehension.

Explore With Annis — Travel & Lifestyle Blog

- Designed mobile-responsive blog applying information architecture and visual hierarchy principles; achieved 94% mobile usability score and average session duration of 3.2 minutes.

Additional Professional Experience

English For Everyone Indonesia (EFE)

English Teacher

Remote
Jan 2025 – Present

- Teach 250+ elementary students across distributed cohorts; design and iterate digital learning materials based on real-time learner engagement feedback and formative assessment data.
- Learning outcomes: Students show average 18% improvement in listening comprehension scores over 8-week cycles; maintain 92% lesson completion rate and 4.8/5.0 student satisfaction rating.

NAZ Malaysia

Social Media & Operations Intern

Remote
Apr – May 2026

- Grew Instagram audience from 2,860 to 4,010 followers — gain of **+1,150 followers (+40.2%)** in 6 weeks through data-driven content strategy combining audience research, trend analysis, and competitive benchmarking.
- Content production: Designed and published 5 end-to-end carousel posts (research → scripting → Canva design → caption writing → CTA optimization); achieved **118,270+ combined views** with top post generating 30,061 views, 862 likes, 475 shares, and 312 new followers.
- Analytics and reporting: Built Google Sheets KPI dashboard tracking 7 metrics (views, likes, shares, saves, comments, follower growth, engagement rate); delivered weekly performance reports identifying content patterns and optimization opportunities; insights drove estimated **50%+ contribution** to overall social media growth.
- New project launch: Independently researched market positioning and built complete brand identity for KL Private Malaysia (@klprivatemalaysia) from zero; designed visual language, wrote brand guidelines, and published 12 initial posts achieving 186 followers in launch month.

Skills

UX Research Methodologies: Qualitative user interviews, usability testing (moderated & unmoderated), heuristic evaluation (Nielsen’s 10 usability heuristics), thematic analysis, persona development, journey mapping, competitor analysis, pain point synthesis
UI/UX Design: Wireframing (low & high fidelity), Figma prototyping, information architecture, interaction design, design systems, responsive design, accessibility (WCAG 2.1 AA), developer handoff documentation
Web & Technical: HTML5, CSS3, responsive design, GitHub Pages deployment, Vercel, basic JavaScript
Design & Productivity Software: Figma (Intermediate), Canva, Adobe Photoshop, Microsoft 365 Copilot, Claude AI, Notion (database & workflow design), Slack
Languages: Bahasa Indonesia (Native), English (Advanced Proficiency — TOEFL equivalent 100+)

Certifications & Achievements

- **Microsoft Education** (Nov 2025) — AI for Learning, Microsoft 365 Copilot, Teams for Education
- **SAP Learning Hub** (2025) — Design Thinking for Business, Digital Skills Initiative
- **3rd Place, Kalla Youth Fest Hackathon 2024** — Carbon emission-reducing turbine design (engineering design thinking); UN SDG alignment (Sustainable Energy)
- **Top 150 Essay, Pekan Ilmiah Nasional**, Andalas University (1,000+ participant national competition)
